WHAT IS INSTRUCTIONAL DESIGN?

THE CREATION OF A TARGETED LEARNING EXPERIENCE
TO HELP SOMEONE PERFORM BETTER ON THE JOB,
SOLVE A PROBLEM, OR USE A PRODUCT.

WHY INSTRUCTIONAL DESIGN?

Instructional

- Focused on learning
- Focused on the learner
- Focused on applying new knowledge immediately

It's instructional because it involves learning—whereby someone is receiving new information, processing it internally, and then applying it in a new set of circumstances.

We call it instructional because it relates to training, or targeted learning, for a specific purpose (usually on the job or with a commercial product).

Design

- Strong, clear writing
- Excellent visual components
- Enhancing the learning experience

There are good ways to present information, but there are also better ways that include design strategies that increase understanding, retention, and eventual application.

Just like you probably use design as a technical writer to make your documents and content more easily understood, instructional designers use design to ensure their training content is clear, understandable, and easy to apply.

WHAT DOES ID PRODUCE?

EVALUATION

1. Collect user feedback.
2. Track completions and activity logs.
3. Monitor user interactions and feedback.
4. Troubleshoot problems as necessary.
5. Identify areas for improvement and plan future releases

Meet periodically with stakeholders to review completion rates, testing results, and other indicators. Plan a “lessons learned” meeting to review outcomes and plan for future improvements/launches.

Kirkpatrick's Evaluation Model

SPEAKING VALUE IN YOUR ORGANIZATION

- What “value language” does your organization speak?
 - What KPIs (key performance indicators) are tracked?
- How can you track value in your training program?
 - What tracking systems already exist in your organization?
- How can you communicate value effectively?

NEXT STEPS

- Integrate course into professional development planning
- Assimilate the course into the larger curricula
- Create a training dashboard for tracking and reporting
- Monitor feedback for updates, modifications, and escalations
- Establish a revision and relaunch plan
- Establish and use communication channels for reporting training outcomes and value
